Meet Dr. Hyans at [njmonthly.com/pss-hyans](http://njmonthly.com/pss-hyans)

When I began practicing, I chose plastic surgery for the diversity of cases and the creativity each case requires. Twenty-five years into my practice, I find myself most motivated by the ways my work can make people feel like the best versions of themselves.

My practice is divided into two parts: cosmetic and reconstructive. The cosmetic side involves procedures of all types, including surgical and non-surgical facial aesthetic procedures; breast reductions, augmentation and lifts; and body contouring. The reconstruction side includes post-mastectomy reconstruction and revision breast surgery.

Plastic surgery, and most poignantly breast reconstruction surgery, is synonymous with hope. Breast reconstruction patients are battling cancer and my work allows them to regain their sense of self while fighting the disease. Making my patients feel confident in the face of a sometimes uncertain future gives both the patient and the doctor hope and perspective.

This notion of providing the benefits of confidence is similar for patients undergoing breast reductions or lifts. Providing these patients with an improved appearance helps to change their self-images and their lives.

I am proud and humbled to have been honored by the American Cancer Society for my treatment of breast cancer patients and to have been named a *New Jersey Monthly* Top Doctor and Castle Connolly Top Cosmetic Doctor for the past 10 years. I share these accomplishments with my terrific staff. Our goal is to provide the best possible care in a skilled, compassionate and personal environment. We want every patient to see in themselves what we see in them: beauty, confidence and hope.

• **DR. PETER HYANS** is recognized by *Plastic Surgery Select* as one of the top **BREAST RECONSTRUCTION** and **BREAST REDUCTION** surgeons in New Jersey.
